

ECONOMIC SECURITY COMMUNICATION

Strengthening EU Economic Security

December 2025

THE EU FACES INCREASINGLY SERIOUS THREATS, SUCH AS:

- ⚙ Deliberate disruptions to global trade
- ⚙ Weaponisation of dependencies
- ⚙ Unfair and predatory practices affecting critical supply chains

THE EU WILL PROACTIVELY TACKLE THESE THREATS, FOLLOWING FOUR MAIN OBJECTIVES:

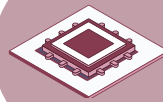

THIS WORK WILL FOCUS ON SIX PRIORITY HIGH-RISK AREAS:

Reducing strategic dependencies

Securing EU leadership across critical technologies

Attracting safe investment into the EU

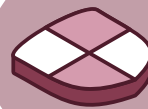

Protecting sensitive information and data

Promoting strong European defence and space industry, and other critical industrial sectors

Shielding Europe's critical infrastructure

THE EU WILL DO THIS BY:

Using existing tools more strategically and in a coordinated way

Developing new tools

Working together with international partners to support derisking efforts while minimising costs for industry.
